

SA-1013 16-Channel Partition Paging Matrix

Features

1. 19-inch standard cabinet design, humanized design
2. Four channels of power amplifier and one channel of emergency output, 16 channels of matrix output, can be extended to 300 zones at multiple stages.
3. 16 zones are designed with separate LED indicators, which can display the working status of each zone. When there are paging and alarm forced switching, the LED working indicator changes from green to red.
4. 16-channel alarm short circuit trigger signal cascade output to the next 16-zone pager
5. It can be controlled by intelligent control center and computer software to open or close at fixed time and fixed area.
6. Manual paging/alarm forced switching can be realized by the light touch key.

Technical parameters

Model	SA-1013
Power consumption	20W
Power source	AC220V~240V 50/60HZ
Size	484×390×88mm
Weight	7.5kg
