

## SA-4028 Programmable Digital Tuner

### Features

1. 19-inch standard cabinet design, humanized design.
2. LCD screen, clear and eye-catching, microcomputer control, light touch key operation.
3. Frequency modulation and amplitude modulation (FM) two-band receiving options, FM receiving frequency: 76MHz ~ 108MHz.
4. Radio frequency automatic search and storage function, up to 99 radio stations can be stored, and power-off memory function is controlled by intelligent central controller and computer software, which can realize automatic channel selection.
5. The vehicle-mounted dedicated digital radio module and integrated radio and tuner module are adopted, which have the advantages of small size, good performance and strong anti-interference;
6. Support infrared remote control;
7. Address dial switch to set the address of the machine to meet the address confirmation when multiple devices are used together.

### Technical parameters

Model	SA-4028
Power consumption	10W
Power supply	AC220V~240V 50/60HZ
Size	484×390×88mm
Weight	6.5kg
