

SA-730FB Explosion-proof Horn Speaker

This explosion-proof horn speaker is widely used in Subways, tunnels, corridors, highways, power plants, oil stations, docks, steel companies and other environments with special requirements for moisture, fire, noise, dust and frost protection.

Features:

1. Excellent sound penetration, bright and not harsh at close range
2. Aluminium alloy die-casting shell, high mechanical strength, strong impact resistance
3. High temperature electrostatic spraying on the surface of the shell, good anti-static ability

Specification

Model	SA-730FB
Explosion-proof label	ExdIICT6;
Enclosure rating	IP66
Input way	Constant pressure 100V
Rated Power	30W
Material	Aluminium
Max sound pressure level	120dB±3
Effective bandwidth	350-5000Hz
Weight	5.5 KG
Operating temperature	-60~80℃
Dimension	Φ300×415
