

Digital Conference Controller SC-6200ME

Features:

1. Using a dedicated 6-core cable connection, outputting 4 sets of 6-core interfaces with 2-way network ports.
2. Cooperate with the digital conference control host to expand the connection to the conference unit.
3. The shell is made of metal material, and the circuit and shell have strengthened connections with the ground wire to ensure the ability to resist static electricity up to 6000V.
4. The 2U metal chassis can be installed on a 19-inch standard cabinet for easy placement and equipment maintenance.
5. Built-in international power supply.

Technical Parameter

Model	SC-6200ME
Main power supply	90~132VAC/180~264VAC by switch
Max power consumption	350W
Output power consumption	≤87W/36V each way
Connection	Dedicated cable(6 core)
RJ45 network port	Connects the host and subordinate extension hosts
Color	Black
Dimensions (LxWxH)	482L*305W*90H
Weight	5.5KG
