

## SD-26D/SD-46D Conference small array speakers

### Features:

It is a two-way column speaker. The unit is made of high-quality raw materials. It has authentic amplification characteristics for human voices and music, and the sound is clear. The precise longitudinal unit arrangement only produces plane waves, with basically no upward and downward diffusion, and no multiple-level attenuation, allowing the sound to travel farther. With stronger sound energy radiation, it can easily achieve uniform sound field.

### Technical parameters

| Model                | SD-26D             | SD-46D             |
|----------------------|--------------------|--------------------|
| Bass unit            | LF:2×6.5",         | LF:4×6.5",         |
| Tweeter              | HF:1x1"            | HF:1x1"            |
| impedance            | 8Ω                 | 8Ω                 |
| Withstand power      | 120W AES,400W Peak | 240W AES,600W Peak |
| Box board            | Aluminum alloy     | Aluminum alloy     |
| Box painting process | Paint              | Paint              |
| Dimensions(HWD)      | 312x140x160mm      | 624x140x160mm      |
| weight               | 7.2kg              | 9.8kg              |
